A Few Of My Favorite Things:

For a 70%:

_____   Create a 5 page website: Favorite movie, book, vacation spot, teacher, animal, sport, band, video game, board game etc. You choose.

_____   Each page should have a unique layout using Div Containers. Choose **_AT LEAST 3_** of your page layouts from the list on the second page.

_____   Each page contains a minimum of 2 pictures.

_____   The site contains 2 embedded videos.

_____   Use three different fonts.

Each of these for +5% points:

_____   Some items on pages are fixed in their position (not affected by scrolling).

_____   Some div containers have the scrolling to deal with the overflow..

_____   Some element (div container, img, video) gets bigger when hovered.

_____   Have your background either be an image or a color gradient

_____   Make your website responsive (so a completely different layout depending on the size) and have your navigation and images change size

_____   Make your navigation only show when a "menu button" gets clicked.

_____   Make your images or div containers fade away if clicked.

_____   Add music to the background.

_____   Try to find aspects you want to add to your page. For example, blurry text, flipping images when you hover, top shadow, change your cursor image, tilted text (I don't mean _italic_), (5% of each of them)

Page Layouts: *At least 3 of your 5 pages must have these layouts.*
